Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election of species, claims 17 and 18 in the reply filed on April 25, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-16 and 19-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Bjerknes et al. (2,854,132). Bjerknes discloses a box for attachment to another item, comprising: a body portion (upper part 1 and lower part 2) capable of being attached (wristlet 9) to a PED; a door (drawer 10) that defines a compartment within which pills can be disposed, the door being movable relative to the body portion to selectively open

and close the compartment; and a connection between the door and the body portion.

See Figures 1-3 embodiments.

With respect to claim 18, note the clips (protrusions 3 with lugs 4) that project from opposing sides of the wall.

With respect to claim 18, note the pair of spaced tracks that are formed between the lower part (1) and upper part (2) that allow the door to move back and forth.

4. Claim 17 is rejected under 35 U.S.C. 102(e) as being anticipated by Carlino (Pub. No. US 2003/0000865). Carlino discloses a box for attachment to an electronic communication device (PED) comprising: a body portion (first half 16) capable of being attached to a PED; a door (second half 18) that defines a compartment within which pills can be disposed, the door being movable relative to the body portion to selectively open and close the compartment; and a connection between the door and the body portion. See Figures 1-3 embodiments.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are boxes analogous to applicant's instant invention.
